

DENTFLUENCE OS

Dentfluence OS

The Operating System for Modern Dentistry

A private briefing for Dr. Rajeev Chitguppi

FOUNDER

Dr. Sumit Firke

Dentist. Founder. Builder.

- Practicing dentist
- Founder of Dentfluence
- Built from real clinical pain
- Built inside a working dental clinic — Tulip Dental
- Every workflow tested on real patients before it shipped

THE PROBLEM

Dentistry runs on fragments

Nothing is connected

Excel sheets

Paper registers

WhatsApp for follow-up

A CRM, bolted on

Separate billing software

A separate PMS

What a PMS does — and doesn't

Practice management software was never built to run the practice

WHAT IT DOES

- OK** Scheduling
- OK** Patient records
- OK** Basic billing

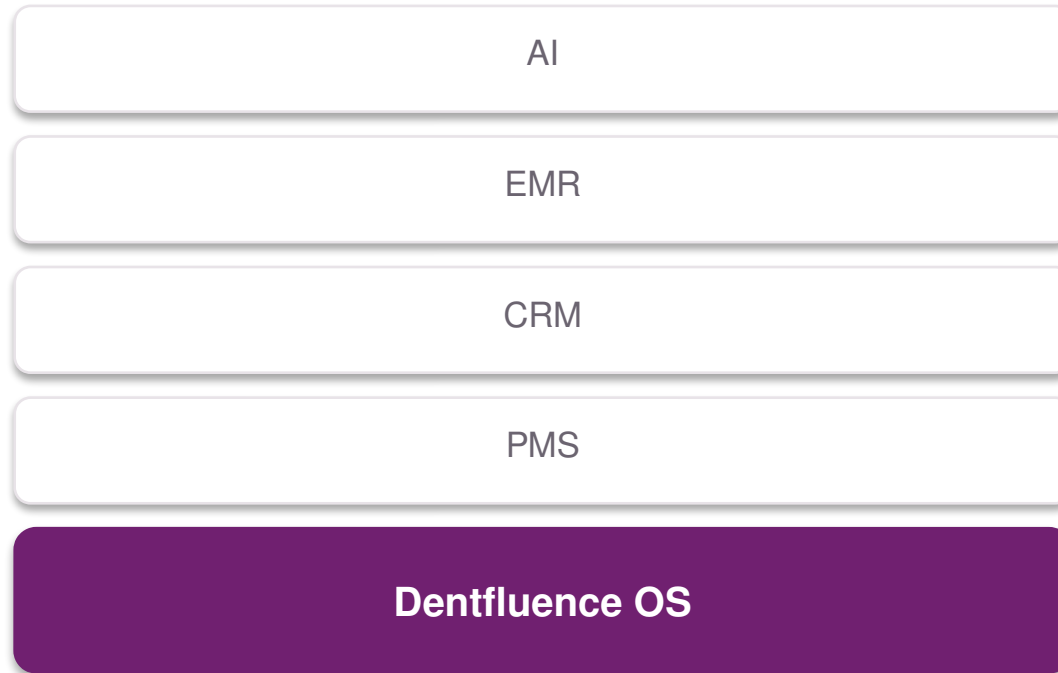

WHAT IT CANNOT DO

- Connect relationships
- Drive follow-up
- See business impact of a plan
- Adapt to daily clinic rhythm

DEFINITION

What is Dentfluence OS

An operating system — not a point tool

Dentfluence Philosophy

Six principles, no exceptions

Ethics First

Every decision passes an ethics check

Workflow First

Software follows real clinic workflow

Dentist First

Built for the clinician's day, not a demo

AI Assists · Doctor Decides

AI never makes the final call

Transparent Growth

No hidden manipulation, ever

High-Level Architecture

Six layers. One system.

Overview

Roadmap, directives, readiness

Clinical

Patients, consultations, treatment plans

Communication

PRE, WhatsApp, marketing

Operations

Finance, inventory, lab, HR

Insights

Reports, analytics

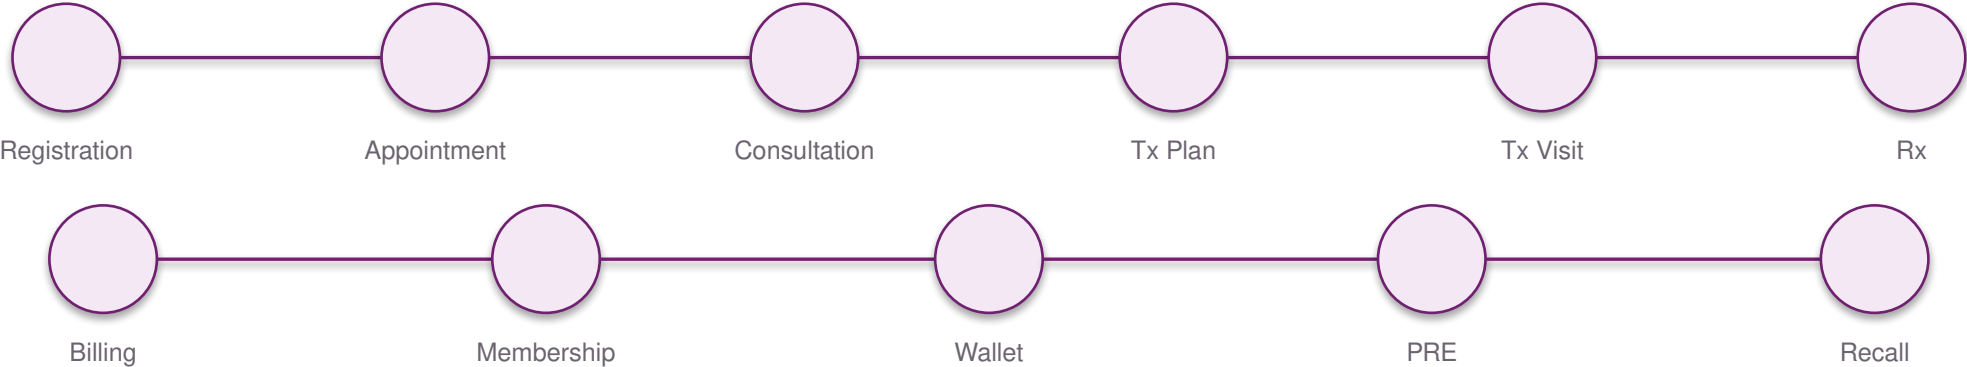

System

Settings, consent, security

Clinical Workflow

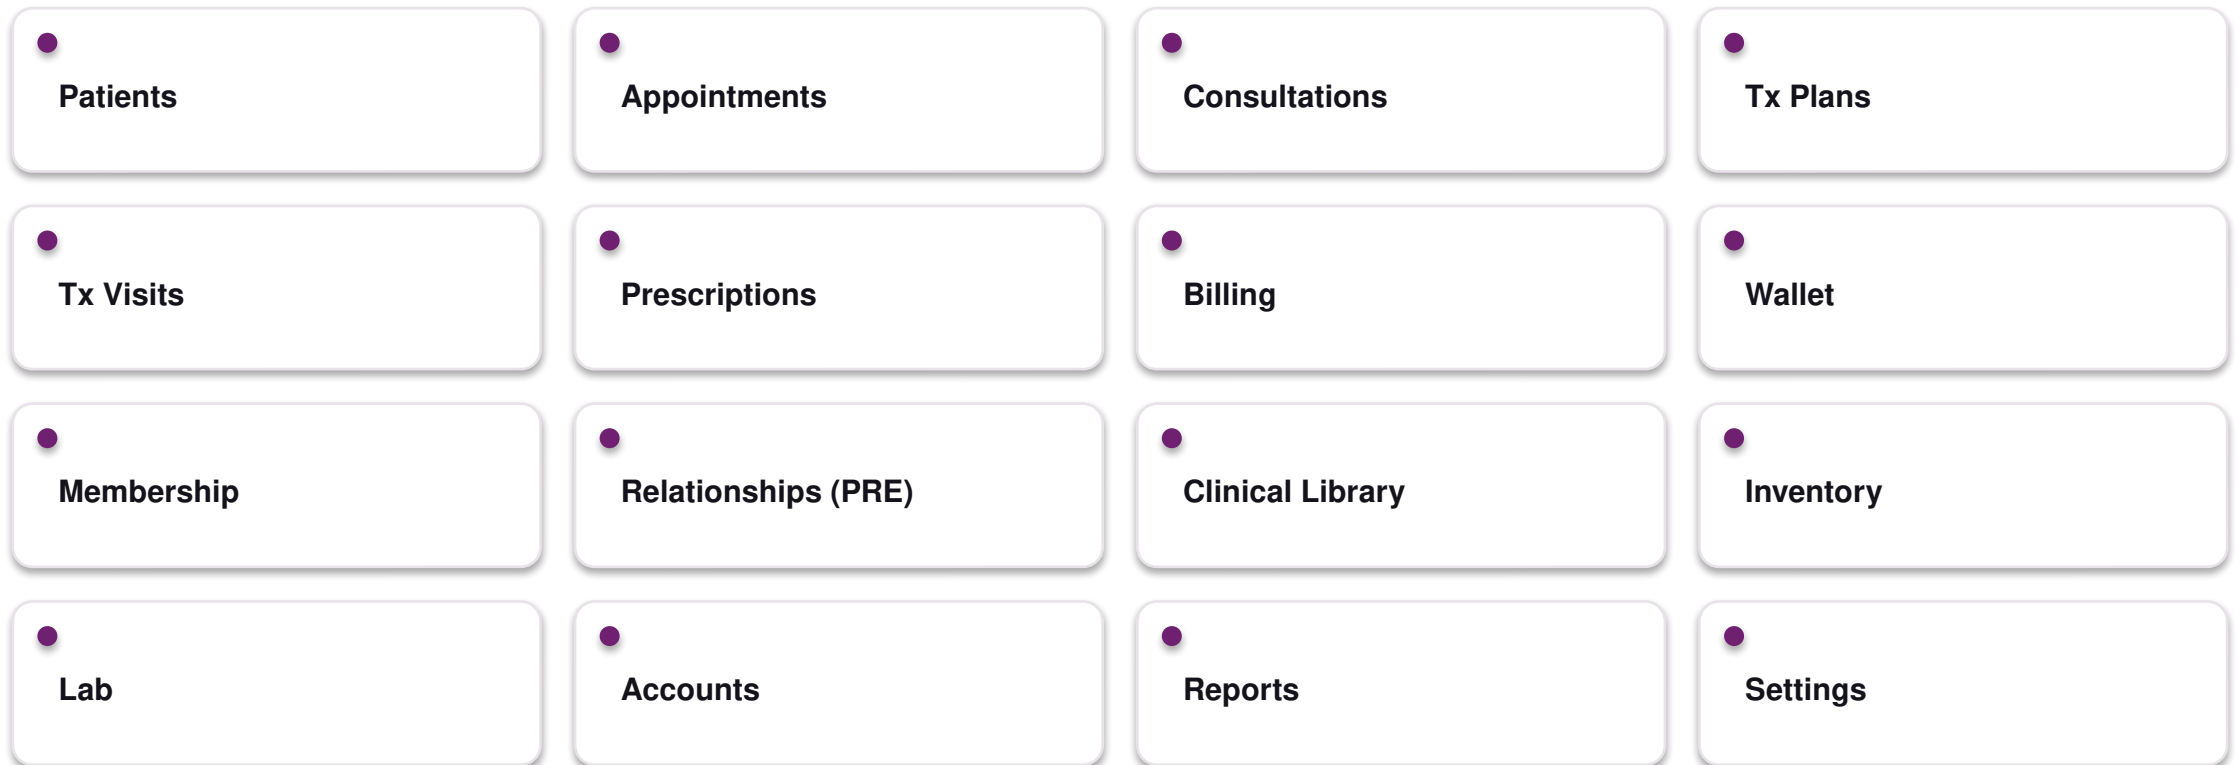

One patient. One continuous record.

MODULES

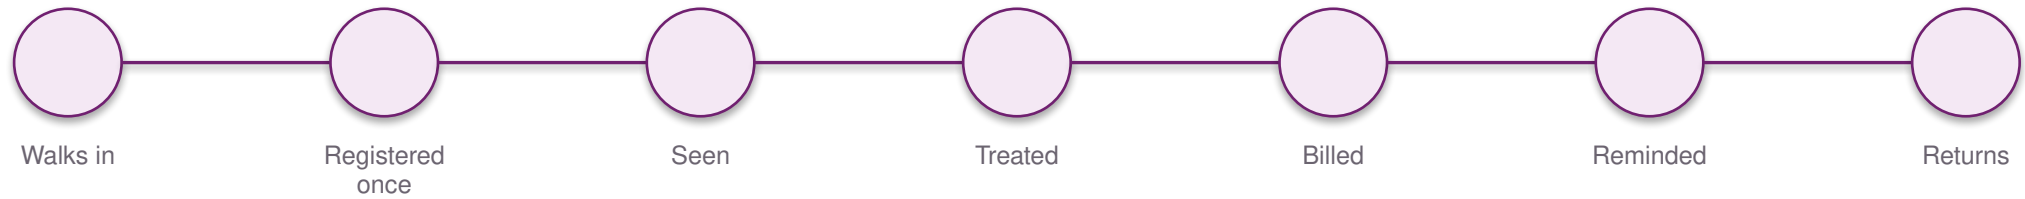

Dentfluence Modules

Sixteen modules. One shared core.

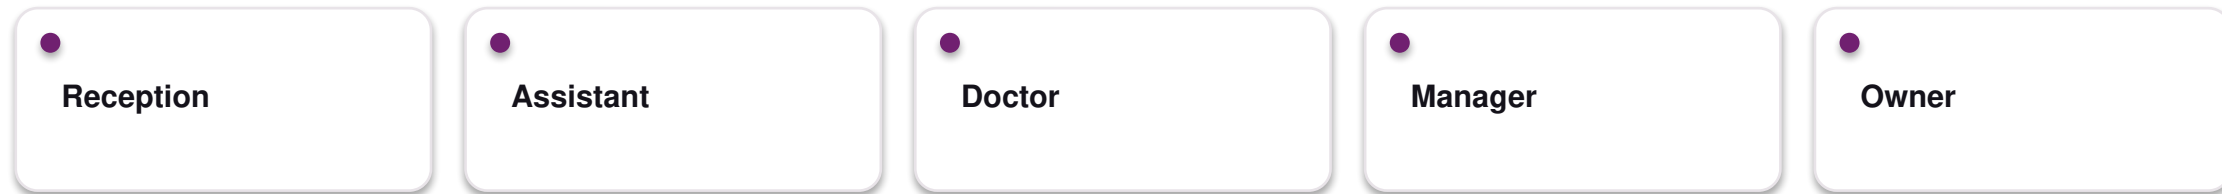

The Patient Journey

What the patient actually experiences

Dentist & Team Journey

One OS. Every role.

The Business Journey

From lead to loyalty

No Separate CRM Required

The CRM is already inside

Patient Relationship Engine

Core PRE — one relationship per patient

Opportunity Engine

Unaccepted plans become tracked opportunities

Recall Engine

Automated, ethical recall scheduling

Communication Engine

WhatsApp, SMS, email — one queue

ACCOUNTABILITY

Staff Accountability

Every action has an owner

COMPLIANCE

Compliance Ready

Built for what's coming, not just what's required

ABHA

DPDP

Consent

Patient Rights

Audit Logs

Data Retention

Ethical Growth Engine

Growth without manipulation

WE DON'T DO THIS

- O** Manipulative messaging
K
- O** Fear-based recall
K
- O** Dark patterns
K

WE DO THIS

- O** Patient education
K
- O** Clinical transparency
K
- O** Trust-driven growth
K

AI Strategy

AI assists. The doctor decides.

Documentation

Clinical Assistance

Automation

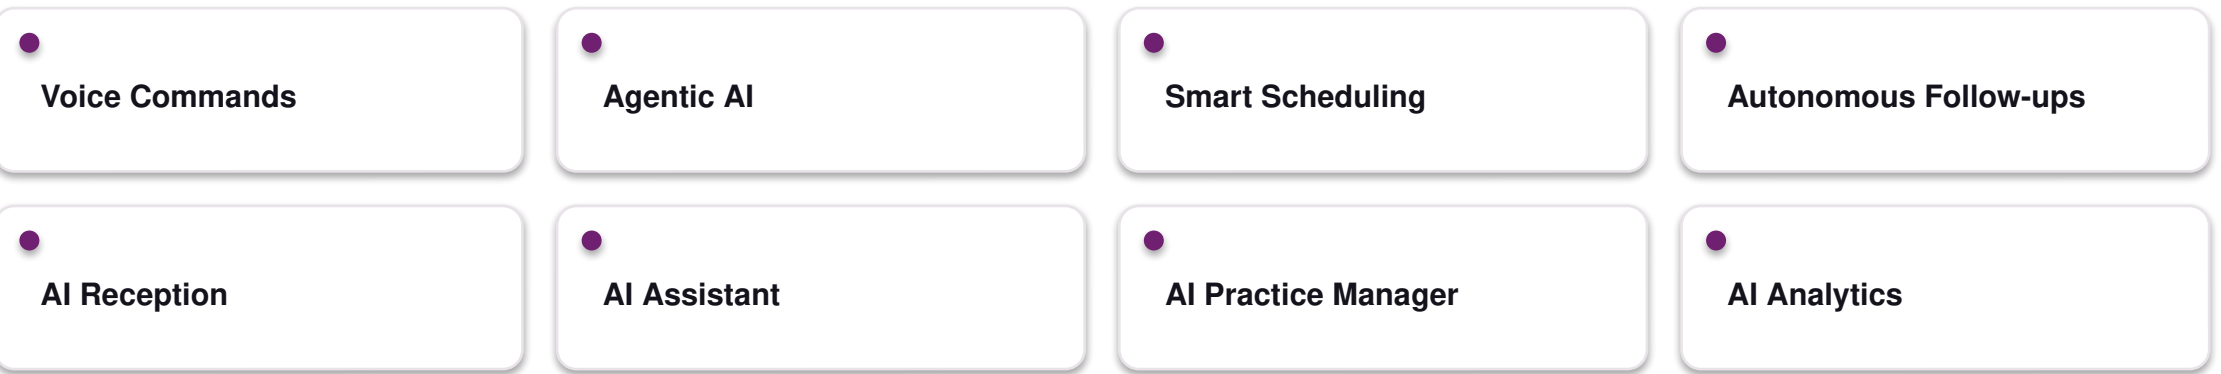

Analytics

Communication

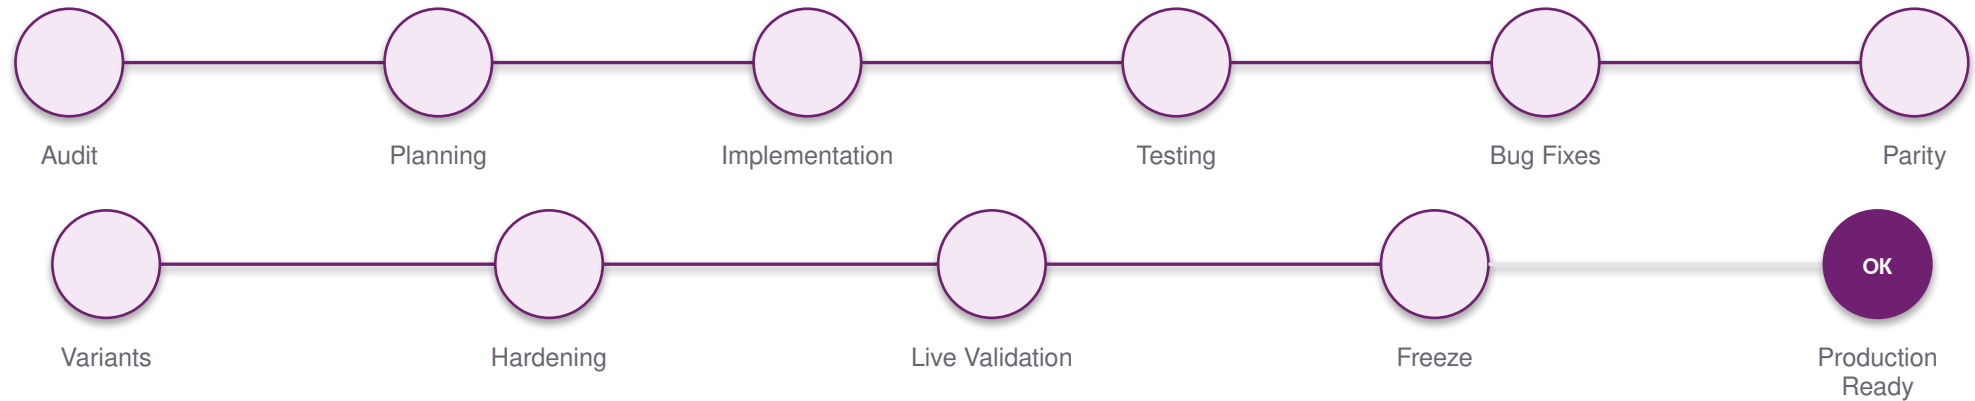

Tulip — the AI Secretary

Where the architecture is designed to go

Engineering Discipline

Eleven gates. Every module. No exceptions.

Why This Is Difficult To Copy

The moat isn't the code

VISIBLE

- OK Code
- OK UI

THE REAL MOAT

- OK Workflow knowledge
- OK Clinical understanding
- OK Years of refinement
- OK Real clinic validation
- OK Ethical philosophy
- OK Integrated architecture

OPPORTUNITY

Business Opportunity

A large, fragmented, underserved market

Subscription

Core OS, per clinic

Clinical Media

Patient education content

Education

CE and training

Marketplace

Vendor and lab network

Enterprise

Multi-clinic groups

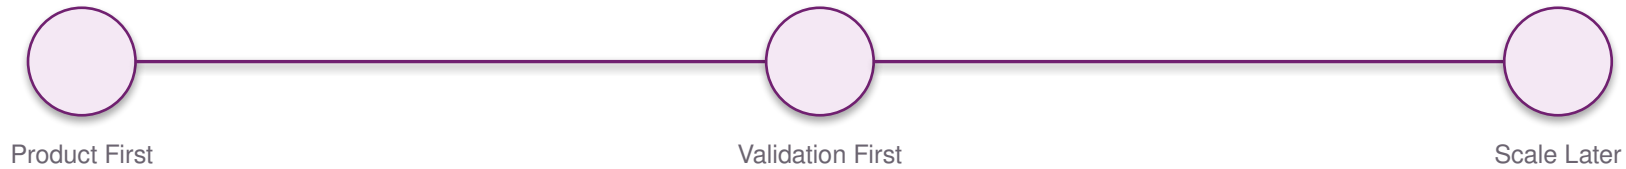

Execution Strategy

Prove it in one clinic. Then scale it.

Why We Are Not Raising Investment Today

Product first. Validation first. Scale later.

THE ASK

Where We Need Help

This is not a pitch. It's an invitation.

Strategic Advisor

Industry Feedback

Clinical Critique

Innovation Guidance

Conference Exposure

Educational Collaboration

Product Validation

Dentfluence is not another dental software.

It is building the Operating System on which the future dental practice will run.
